

A. CLASSIFICATION OF SUBJECT MATTER IPC 7 F16J15/32		
According to International Patent Classification (IPC) or to both national classification and IPC		
B. FIELDS SEARCHED Minimum documentation searched - (classification system followed by classification symbols) IPC 7 F16J		
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched		
Electronic data base consulted during the international search (name of data base and, where practical, search terms used) EPO-Internal		
C. DOCUMENTS CONSIDERED TO BE RELEVANT		
Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	US 5 066 024 A (HAGG DIETER ET AL) 19 November 1991 (1991-11-19) column 1, line 29 - line 33 column 1, line 65 - column 2, line 2 column 2, line 50 - column 3, line 13 figures 1-3	1-11
X	DE 39 07 614 A (MOTOREN TURBINEN UNION) 13 September 1990 (1990-09-13) figure 1 column 2, line 22 - line 50	1-11

To Point V

Reasoned statement with regard to novelty, inventive step and industrial applicability; citations and explanations supporting such statement.

1 With regard to Claim 1:

- 1.1 Claim 1 satisfies the requirements of Article 33(2) to 33(4) PCT in terms of novelty, inventive step and industrial applicability.
- 1.2 Since none of the publications cited in the search report or assessed in the description introduction specifies the features of the independent claim 1 in their entirety, the subject of claim 1 is novel.
- 1.3 The publications mentioned in the search report do not give a person skilled in the art any suggestion, in the case of a brush seal according to the preamble of the main claim 1, according to US-A-5,066,024, of executing the fixing according to the characterizing part of claim 1. The measure suitable for producing a multiple brush ring carrier, the second brush ring carrier being fixed to the first brush ring carrier by means of a snap connection (in particular, an unreleasable snap connection) arises from a step which does not constitute a conclusive development of the cited prior art. The brush seal according to claim 1 is therefore based on inventive activity.
- 1.4 The subject of claim 1 can be produced and can be used and is therefore also deemed to be commercially applicable.

2 With regard to claims 2-11:

- 2.1 Claims 2-11 are dependent on claim 1 and consequently likewise fulfill the requirements of the PCT in terms of novelty, inventive step and industrial applicability according to Articles 33(2) to (4) PCT.
